FOR IMMEDIATE RELEASE

**NEW ENVIRONMENTALLY-FRIENDLY FORM
OF CREMATION COMING TO CANADA**

Toronto, ON, October, 2009 - An eco-friendly alternative to cremation is now available for the first time in Canada as a result of the partnering of new technology company Transition Science Inc. and Park Lawn Income Trust, one of Toronto's preeminent owners of cemeteries and crematoriums.

The bio-cremation procedure called Resomation® provides an added choice to families looking for more environmentally friendly alternatives when making funeral decisions.

"Resomation has been developed in response to increasing environmental awareness and concerns among consumers", says Allen Bessel, President of Transition Science Inc., the company responsible for bringing the new technology to Canada. "While carbon emissions are a major contributor to climate change and considered the biggest environmental issue of our time," says Bessel, "Resomation offers an alternative that allows for the same funeral experience as cremation but without the same impact on the environment."

Unlike cremation, Resomation uses considerably less energy. The process also avoids emitting toxins and dioxins – including mercury – that can harm the environment into the atmosphere.

Studies by global engineering firm Parsons Brinckerhoff Ltd. show that traditional cremation produces up to nine times more carbon emissions than Resomation. Gas and electricity consumption was also significantly lower with the new process.

“We’re proud to be working with Transition Science to bring this process to Canada,” says Larry Boland, CFO of Park Lawn Income Trust. “This innovative service is a welcome change for customers who are interested in a greener alternative.”

The first bio-cremation system will be installed in Toronto by late Spring 2010.

Transition Science Inc. is the licensed distributor of Resomation® in Canada. Resomation® is an environmentally friendly alternative to cremation and is both dignified and respectful. For information about Transition Science Inc. (previously Evergreen Transitions Inc.) contact: Allen Bessel, President abessel@transitionscience.com (416) 567-1302.

Park Lawn Income Trust is a trust established to indirectly hold six cemeteries in the Greater Toronto Area and an interest in Bloorpark Developments Inc. Its units are listed on the TSX Venture Exchange (PLC.UN). Contact: Frank Mills, Trustee (416) 231-1462.
